Woodbridge, VA 22193

**RE: Possum Point Power Station VPDES Permit No. VA0002071:  
Modification Request Letter**

Dear Ms. Mackert:

As requested in our meeting at the Possum Point Power Station on September 28, 2015, which included a discussion on the August XX, 2015 Permit Modification Request Letter for our Ash Pond Closure Project, we have included herein additional clarification on the Permit Modifications Request Letters dated June 30, 2014 and December 22, 2014.

1. Clarification on June 30, 2014 Modification Request:

- **Remove Outfall S104.** Ash Ponds A, B, and C are presently being decommissioned and the impoundment will be retired. Ash material in Ponds A, B and C is being relocated to Ash Pond D. Ash Dewatering and Contact Waters are presently being directed to Ash Pond D for storage. Upon clean closure of Ash Ponds A, B, and C, Stormwater Outfall S104 will be eliminated. Therefore, the stormwater discharges that disturb ash within the drainage area of inactive Ponds A, B, and C are no longer being discharged to Outfall S104 and this Outfall will be no longer required upon closure of Ponds A, B, and C.
- Dominion would like to continue to recognize the Unit 6 Reverse Osmosis (RO) trailers as a permanent discharge.
- Dominion would like to continue to incorporate the several additional minor changes to permit language and update outfalls description in the permit.

2. Clarification on December 22, 2014 Modification Request:

- **Remove Outfalls S105, S108, and S109.** Dominion would like to continue to request coverage of Outfall S35. Dominion will eliminate Outfalls S105, S108, and S109 as approved Industrial Stormwater discharge outfalls as a result of the removal of these outfalls with the Ash Pond Closure Project.
- Dominion would like to continue to request that permit condition I.A.12 be modified to recognize that industrially influenced storm water may be discharged through existing storm water Outfall S107.
- Dominion would like to continue to request the miscellaneous changes to the permit conditions (e.g., Operation and Maintenance Manual Requirement, Materials Handling/Storage, etc.) except:
  - I.A.12 Effluent Limitations and Monitoring Requirements (Stormwater)
    - **Remove Ponds A/B swale.**
  - I.D.3.a Site Characterization
    - **Remove Ash Ponds A, B, C, D, E.**

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and

evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Sincerely,

Cathy C. Taylor  
Director, Electric Environmental Services
